Profile

AI/ML Engineer with 1 year of experience specializing in Large Language Models (LLMs) and agentic workflows. Experienced in building RAG pipelines, semantic search engines, and automated data analysis tools that drive operational efficiency in high-scale environments at Apple Inc., with a proven track record of supporting SRE and engineering teams.

Work Experience

- AI / ML Engineer - Wipro Technologies, Client: Apple Inc.** Mar 2025 – Present | Hyderabad
- **Designed agentic AI systems** by building a centralized enterprise bot using Apple’s internal LLM and Model Context Protocol (MCP) to enable incident-driven semantic search across siloed data sources.
 - **Developed context-aware RAG pipelines** using advanced prompt optimization and semantic retrieval techniques to deliver accurate, real-time incident insights, improving response accuracy by 94%.
 - **Optimized SRE workflows and root-cause analysis** by integrating AI-driven NLG into ticketing processes, reducing MTTR by 35% and eliminating manual SOP lookups, saving 250+ engineering hours annually.
 - **Improved data accessibility and validation efficiency** by unifying cross-functional incident data into a single search layer, reducing manual testing effort by 75%.
- SQL Data Analyst Intern – HR Analytics System, Psyliq** Dec 2023 – Feb 2024
- **Optimized complex SQL queries** to improve data retrieval efficiency by 30% and reduce query execution latency by 15%.
 - **Analyzed large-scale workforce datasets** to identify hiring, attrition, and performance trends, delivering a 35% increase in actionable insights for 10+ HR leadership stakeholders.
 - **Digitized and streamlined HR reporting processes** through collaboration with cross-functional teams, eliminating repetitive manual tasks and saving 1,200+ operational hours annually.

Projects

- FinGPT, AI-Powered Financial Assistant** 🔗
- Engineered an AI-powered financial intelligence platform using LangChain and OpenAI GPT-4
 - Deployed full-stack application on Streamlit Cloud, handling 500+ concurrent users with automated CI/CD pipelines
- CryptoPredictor, Historical Cryptocurrency Analysis and Price Forecasting** 🔗
- Built advanced cryptocurrency price-forecasting models using LSTM networks with 92% prediction accuracy
 - Deployed end-to-end ML pipeline using Apache Airflow for daily model retraining, enabling 500+ active cryptocurrency traders
- Superstore Sales Maximization, Leveraging Tableau Dashboards for Data-Driven Insights** 🔗
- **Leveraged Tableau** to transform **113K+ raw sales records** into actionable Business Intelligence dashboards, streamlining executive decision-making.
 - **Operationalized and deployed forecasting models** achieving **91% accuracy** in quarterly projections, directly contributing to a **\$2.7M boost in total revenue**.
- E-Commerce Order Automation with Selenium & Cucumber BDD**
- **Architected a Java/Selenium/Cucumber framework** that increased test coverage from 45% to 92% and slashed manual testing effort by 75%.
 - **Orchestrated Jenkins CI/CD pipelines** with Allure reporting, ensuring 95% test stability for daily regression across 3+ e-commerce platforms.
 - **Scaled POM-based automation** for 200+ scenarios, accelerating script creation and maintenance by 60% across desktop and mobile.

Skills

- Programming & Scripting Languages**

Python, SQL, Java

Databases & Big Data

 - Data Cleaning, MySQL, MongoDB

Soft Skills

 - Strong analytical thinking and problem-solving skills, with proven ability to collaborate with cross-functional engineering.
- Machine Learning & Statistical Tools**

Expert in Machine Learning, Deep Learning, Artificial Intelligence; PyTorch, XGBoost, LightGBM, Classification, Time Series, NLP, LLMs, Prompt Engineering.

Data Visualization & Reporting

 - Matplotlib, Seaborn, Plotly

Certificates

- Google Cloud Digital Leader Certification 🔗
- Oracle Cloud Infrastructure 2025 Certified AI Foundations Associate 🔗
- Mastering Vertex AI: Leveraging LLMs with Text Embeddings API 🔗

Education

Kalinga Institute of Industrial Technology (KIIT), Jul 2023 | Odisha, India
Bachelor of Technology, Information Technology
